

FINAL PHASE

ARCHITECTURAL, INTERIOR, FINISHING

2025

FINISHINGS CATALOGUE

Often the most important phase of projects "The Final Phase" is limited to budget constraints and a lack of available options and resources. @ Final Phase we will work with your designers, or provide you with a designer to turn your wildest dreams into reality.

2024-2025

WELCOME TO CREATIVE SPACES

@ Final Phase we will create your dream finishes with a variety of the latest products and solutions in the market. We do not only offer assistance in selecting your desired Finishes, but provide you with the Specialist Labour to apply the products and systems. This will assist you in budgeting for this critical Final Phase of your project.

WALL FINISHINGS

FRESCO | STUCCO | ROMAN PLASTER

FRESCO

1.1

AFRICOTE®
Paint & Seamless Wall & Floor Solutions

FRESCO

Fresco (Liquid Stucco) has been designed as an easy to apply liquid paint on then trowel process, formulated to give the effect of traditional Italian plaster

(Intanaco). Africote's Fresco (Liquid Stucco) is ideal for use internally, BUT IS NOT suitable for exterior use or high moisture areas eg: bathrooms and kitchens.

It gives walls and feature walls a unique toned natural appearance. Fresco (Liquid Stucco) is best polished once cured with one of Africote's specialised colour decor waxes to achieve unique two toned contrasting colours as seen on the adjacent page.

The stucco is best applied to masonry surfaces, block and brickwork fibre cement and suitably primed walls. (Refer to our technical data sheet for more info)

FRESCO

“Magic Touch” :
wax for a elephant hide textured finish,
available in several colour options.

STUCCO

1.2

Africote®
Paint & Seamless Wall & Floor Solutions

STUCCO

Africote's traditional Stucco is a pigmented powder based plaster, applied by trowel, to recreate a unique, subtle, marbled appearance, revealing a beautiful rural Italian Plaster effect.

Ideal for transforming walls, vanity tops and kitchen counters. Stucco is available in a range of 15 fashionable colours, with the variation option to add Shellac to the stucco mix to create a "Shell" like appearance in the plaster.

When used in conjunction with the relevant specified water resistant Africote Sealers, Stucco can be used in areas, high in moisture, such as kitchens, bathrooms and showers. (Refer to our technical data sheet for more info)

1.2

AFRICOTE®
Paint & Seamless Wall & Floor Solutions

STUCCO

Shellac can be incorporated into any Stucco colour which reveals an attractive shell like appearance once sanded and sealed.

ROMAN PLASTER

1.3

AFRICOTE®
Paint & Seamless Wall & Floor Solutions

ROMAN PLASTER

Roman Plaster is a versatile, colour pigmented cement polymer modified plaster. Designed to produce a unique, rustic, Tuscan marbled finish on interior and exterior walls.

Formulated to accommodate plaster thickness tolerances of up to 8mm.

An experienced plaster applicator can create cosmetic marbled colour variation. During the "damp" stage, Roman Plaster can be cut and sculptured to replicate masoned stone blocks.

FLOOR FINISHINGS

VALENCIA | SCREEDS | CHEMSTAIN | NATURAL STONE

VALENCIA

2.1

Africote®
Paint & Seamless Wall & Floor Solutions

VALENCIA FLOORING

Africote Valencia is formulated in a fine texture to give a seamless variegated marbled floor finish.

Valencia adheres to raw cement floor screeds, rendering a "smooth or elephant hide texture" depending on the application procedure.

The earthy swirled appearance of the Valencia, enhances floors where a dynamic ambiance is sought after, such as homes, offices, game lodges, and entertainment areas. Valencia is suitable for interior use only.

Ideal for re-coating old screed floors, tiled floors etc, provided the substrate is sound. Can also be applied over wood floated or steel trowelled new mortar screeds.

SCREEDS

2.2

Africote®
Paint & Seamless Wall & Floor Solutions

SCREEDS FLOORING

SL Floor Hardener is a specially formulated mixture of Portland cement, selected and screened natural raw materials and light, fast, organic pigments. SL Floor Hardener is applied by 'Dry Shake' method over semi-dry screed and hardens to a rustic and more marbled finish.

SL Floor Hardener colours the top layer of a screed, imparting a hard wearing skin, which is smooth to the touch once cured and sealed. It provides a seamless finish.

The screed does however require expansion joints, as with any concrete screed. Sealing of the floor with Africote Twin Pack Polyurethane sealer, will enhance the colour of the floor and aid in floor maintenance and assist in preventing possible stains.

2.2

SCREED FLOORING

CHEMSTAIN

2.3

AFRICOTE®
Paint & Seamless Wall & Floor Solutions

CHEMSTAIN

Chemstain is a low viscosity product, that chemically reacts and etches into cured concrete or cement plaster surfaces.

The swirled natural stone and slate effect provides the warmth and beauty of nature's own materials. Chemstain is ideal for creating interesting effects with borders and patterns, for floors whilst avoiding the thick, coated appearance of conventional paints.

Chemstain creates uneven, variegated or translucent colour effects on concrete surfaces, much like the shadings of natural stone or the aged appearance of a time worn patina.

The result is absolutely unique to each surface and cannot be duplicated by other colouring materials.

2.3

CHEMSTAIN

AFRICOTE®
Paint & Seamless Wall & Floor Solutions

NATURAL STONE

2.4 **AFRICOTE®**
Paint & Seamless Wall & Floor Solutions

NATURAL STONE

This unique, granular resin composite stone flooring system, is trowelled onto an existing concrete base to achieve a beautiful natural compact, yet finely textured stone carpet appearance.

Only selected and specially sized natural stone, sourced from Southern Africa, is used. Hence the stone colours are permanent and aesthetically pleasing.

Our Natural Stone is sourced for its abrasion resistance, unique colour range and durability under our harsh African conditions.

The flooring can be used indoors or outdoors and has a non-slip texture. We can as a special request "colour the stone" in a colour of the clients choice - only suitable for interiors.
